860 Purchase Order Change Request - Buyer Initiated

Functional Group ID=PC

Introduction:

This standard contains the format and establishes the data contents of the Purchase Order Change Request - Buyer Initiated Transaction Set (860) for use within the context of Verizon Business Purchasing's Electronic Data Interchange (EDI) environment. The transaction set can be used to provide the information required for the customary and established business and industry practice relative to a purchase order change. This transaction can be used: (1) by a buyer to request a change to a previously submitted purchase order or (2) by a buyer to confirm acceptance of a purchase order change initiated by the seller or by mutual agreement of the two parties. Verizon Business Purchasing uses information from the purchase order to match it with the Purchase Order Acknowledgement (855) and the Advanced Ship Notice (856). Therefore, three fields from the original purchase order and/or the PO Change order must be returned on these two transactions; the purchase order number, the line item number and the buyer's part number.
